6. During the night, the city is very quiet, and the streets are empty. The only sound is the soft rustling of leaves in the wind. The moon is full and bright, and the stars are shining in the dark sky. The air is cool and fresh, and the night is so peaceful. It is a beautiful sight to see the city at night, and it is a wonderful experience to be there.

Scoring the Panic Disorder Severity Scale

The Panic Disorder Severity Scale (PDSS) is a clinician-rated measure of the severity of panic disorder. It consists of 10 items that assess the frequency, severity, and impact of panic attacks. The total score ranges from 0 to 100, with higher scores indicating more severe panic disorder.
